

June 2010 - Monthly Newsletters

## Best Practices for Planning your Automated Test Effort

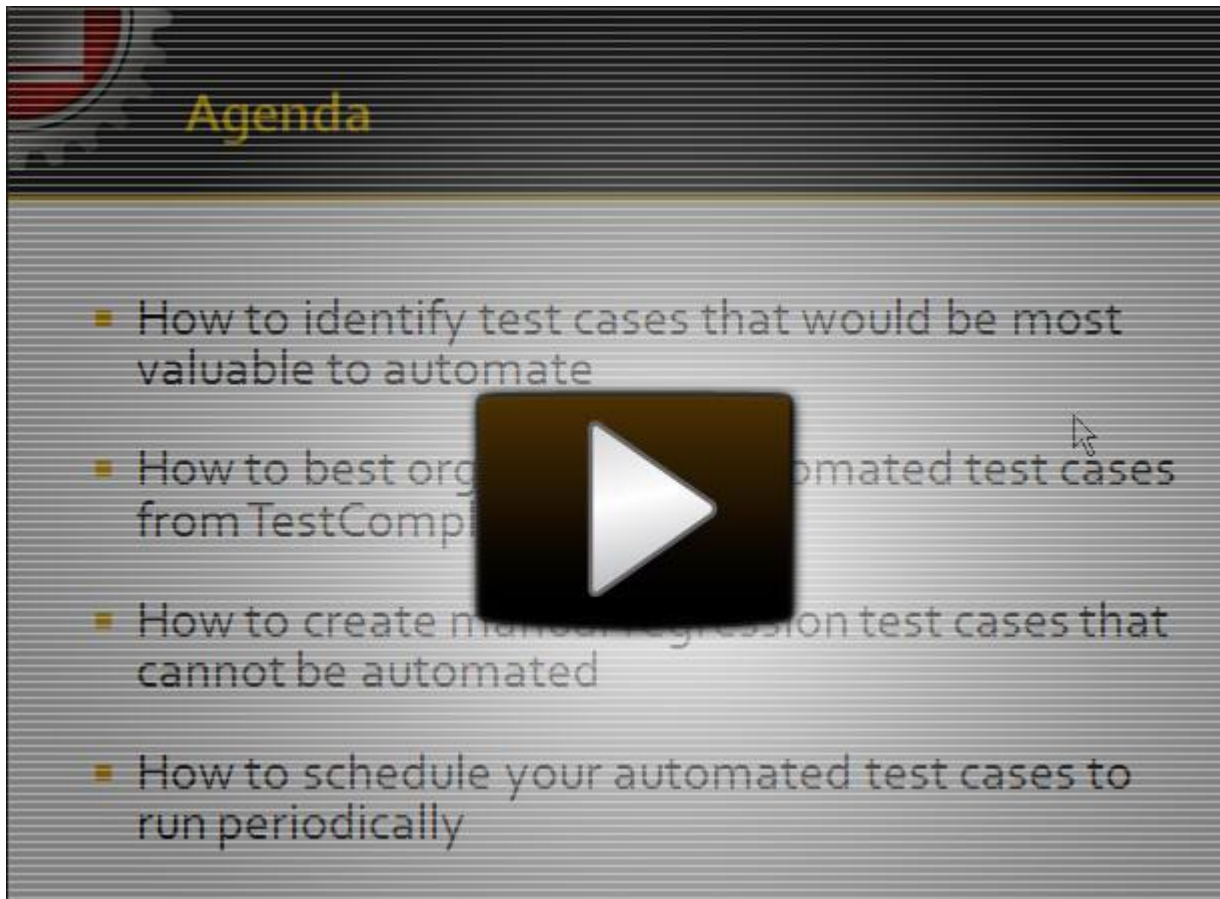

This month's newsletter is delivered as an On-Demand webinar. It is the 1<sup>st</sup> in a 5 part series entitled "**Uniting your Automated and Manual Test Efforts**" and focuses on best practices for planning your automated test effort.

### Best Practices for Planning your Automated Test Effort

Click on the movie below

(<http://www.softwareplanner.com/guidedtours/edgeui/Camtasia.asp?filename=UnitingPart01>) to begin the presentation. You will learn:

1. How to identify what test cases should be automated
2. How to best organize your automated test cases
3. How to version and protect your automated test cases
4. How to schedule your automated test cases to run periodically

The image shows a slide titled "Agenda" with a list of four bullet points. A large play button icon is overlaid on the slide, indicating it is a video player. The text on the slide is as follows:

## Agenda

- How to identify test cases that would be most valuable to automate
- How to best organize your automated test cases from TestComplete
- How to create manual regression test cases that cannot be automated
- How to schedule your automated test cases to run periodically

## What's Coming Next Month

Look for our next On-Demand video next month, “**Best Practices for Planning your Manual Test Effort**”. Thank you and we hope you enjoy this On-Demand Webinar. Happy testing!
