- What's Ahead?
 - The future of the software testing profession
 - What are the driving factors?
 - Observations/recommendations

Survey Overview

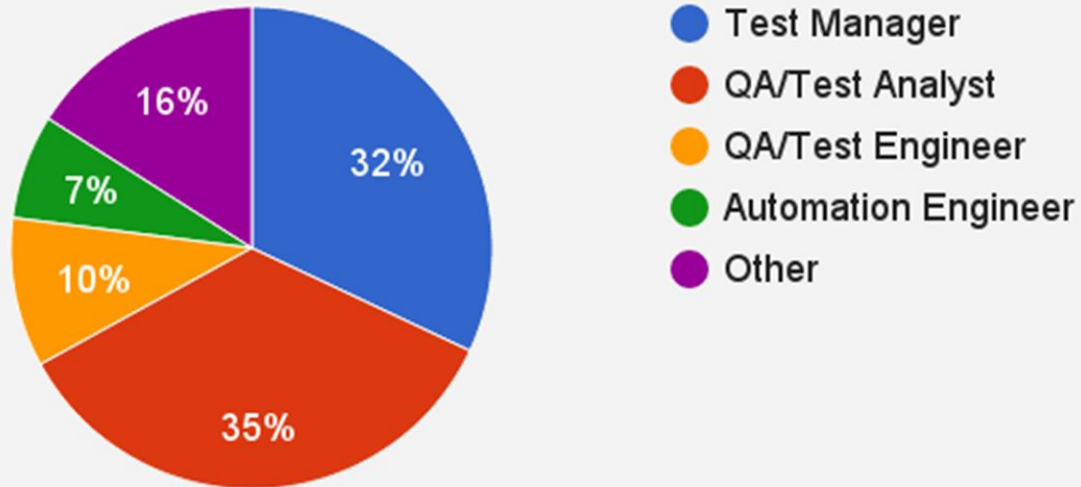

33 Questions focused on:

- The testers role & work
- Changes over the last 12 months
- Key practices & techniques
- Pre & post release quality
- Opinion of the future of the tester role
- Tools used

Demographics - 495 Responses

Job Title

Our Testing Roots

Why did you become a tester?

Testing is my passion

What was your first job before getting into testing?

Developer/programmer – 20%

Testing was my first Job – 18%

Business user/analyst – 14%

Career Goals

Do you want to continue your career as a tester?

Dev Methods & Technologies

Primary life cycle model?

Agile-Scrum - 34%

Agile-Waterfall – 39%

Primary technologies tested?

Web Apps and Web Services

Key Practices:

Automated Testing

Continuous Integration, Delivery & Testing

Test Methods & Techniques

Common test approaches

How Much Automation?

Unit	Integration	System	Acceptance
Some	Limited	Some	Limited

Change in Number of Testers

46%

Added
Testers

No change

31%

Reduced
Testers

19%

Primary Changes in Testing

Has your testing role changed?

Majority - No change

How will role change over the next 12 months?

Yes - Become more technical

Yes - Acquire more business skills

Pre- and Post Release Quality

Increased Unit Testing

Improved Testing Focus

Dev Build Quality Up

Post Release Defects Down

Commonly Used Tools

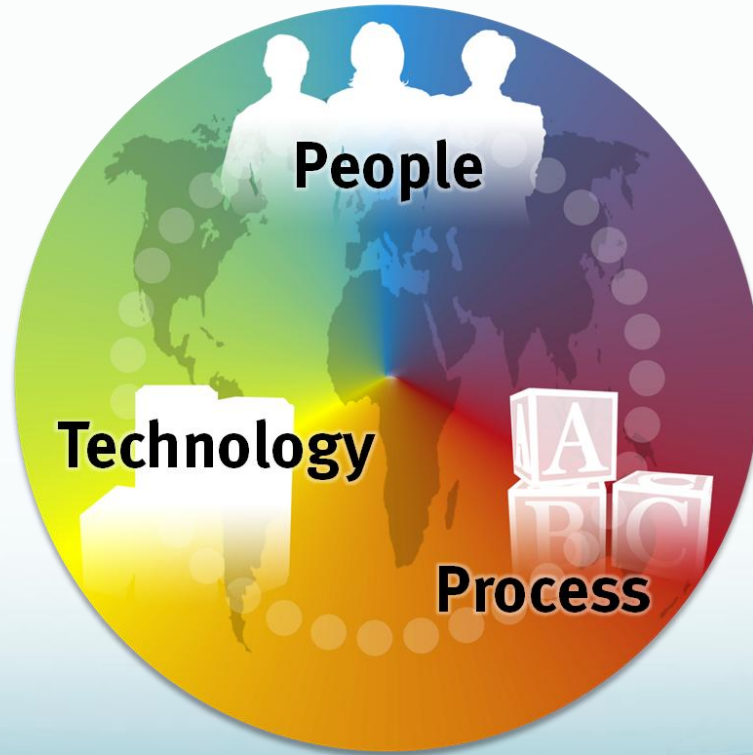

- Defect Software
- Text Documents & Spreadsheets
- Open Source Functional Testing Tools
- Scripting Languages
- Commercial Functional Testing Tools

Current and Planned Certification

Testing - Yesterday and Today

Agenda

- Survey Findings
 - Changes
 - Methods/tools & automation
 - Product quality
- What's Ahead?
 - The future of the software testing profession
 - What are the driving factors?
 - Observations/recommendations

Truths and Myths

- Testing is a whole-team responsibility
- Testing the idea and the product is good
- Agile and other iterative methods work
- Can't test quality in – must build it in
- Testing is about risks
- Defects abound

Truths and Myths

- Anyone can do testing
- Being a tester is a compromise
- Automation is the magic bullet
- Businesses don't care about quality
- One approach works universally

VERY ALive!

On The Future of Testing

Role of tester must be transformed:

89% Agree

- Agile changes the tester role
- Testers must become more technical

Tester should be a skilled role:

77% Agree

As long as humans are accountable for software we will need testing expertise:

91% Agree

Testing Remains Critical

Highlights of 2014 Outages

- Drop Box
- Gmail
- Google Services
- Adobe
- Icloud
- Microsoft

Bugs Still Plague Us

- Human Nature
- Increasing Complexity
- Competitive Pressure
- Poor Risks Decisions
- Improved Testing Techniques

The Next Decade - Technology

- Computing everywhere
- The Internet of Things (IoT)
- 3D printing
- Analytics
- Context-rich Systems
- Smart machines
- Cloud/client Computing
- Software defined apps
- Web scale IT
- Risk based security

The Next Decade - Testing

- Security testing
- Cloud testing
- Big data testing
- Telematics testing
- Digital commerce testing
- IoT testing
- DevOps
- Service virtualization
- Mobile testing
- Infrastructure testing

Today's Testing Scene - 2015

Key Strengths

- 40 year foundation
- Emerging methods
- Training
- Community
- Sound technology
- Standards

Key Challenges

- Knowledge
- Innovation
- Technology
- Leadership
- Transformation

QA & Test Budgets on the Rise

- Testing and QA now represent 26% of total IT budgets on average
 - Up 23% from 2013
 - Up 18% from 2012
- The share of testing budgets is expected to reach 29% by 2017.

Observations/Recommendations

- The testing profession is NOT dying!
- Agile is here to stay
- Automation is an imperative
- The probability of mobile being in your future is high
- Continual transformation is a must
- There is tremendous opportunity to specialize

Four Career Paths for Testers

- Architect of Testing Guru
- Coordinator of Testing Guru
- Automator of Testing Guru
- Business User Testing Guru

Own Your Career as a Tester

- Keep pace with the transformation and transform!
- Chose a specialty
- Have a personal development plan & roadmap
- Have an industry focus
- Take accountability for growing your expertise
 - Creativity/innovation
 - Leadership
 - Results

Invest in Superpowers

- Ambition
- Passion
- Specialization
- Learning
- Derivation
- Creativity
- Interesting
- Storytelling
- Leadership

Closing Thought

“As long as people are accountable for software development there will be a need for skilled testing roles...”
