Test Automation

Thursday, October 4th, 2018 3:00 PM

# **An Innovative Test Automation Approach without Making Test Cases**

Presented by:

**Mehmet Duran and Hatim Chahim**

ProRail

Brought to you by:

350 Corporate Way, Suite 400, Orange Park, FL 32073  
888-268-8770 · 904-278-0524 - [info@techwell.com](mailto:info@techwell.com) - <http://www.starwest.techwell.com/>

## **Mehmet Duran**

Mehmet Duran is a Project Leader in Automation. He offers experienced-based QA and tooling service which improves the software quality within organizations. At a company in the railway sector he has implemented automation within a complex IT landscape. As a Project Leader Automation, he is focused on implementing innovative solutions around the QA. Mehmet also offers training, and consulting services helping clients evolve their business processes and make it more efficient.

## **Hatim Chahim**

Hatim Chahim is an experienced program (test) manager, agile project manager and senior advisor test tooling with more than thirteen years' experience in IT industry and is currently working at ProRail. He has worked at the largest IT companies such as Capgemini and Accenture. Within ProRail, Hatim is responsible for managing large test teams at program level. At the program level, Hatim has developed test policies for test automation. Hatim has worked diligently to improve the test approach within the rail sector, making it both more accessible and functional. He is a leader in software and systems testing. He also gives training and consulting services about test automation tools.

# An innovative test automation approach without making test cases

**Hatim Chahim & Mehmet Duran**

4 October 2018, STARWEST

# How to keep 1.2 Million customers happy (each day)

## Passengers per year

- 68 Million - Schiphol Airport
- 80 Million - Los Angeles Airport
- 88 Million - Railway Central Station Utrecht

## Average per day

1.2 Million train passengers in The Netherlands

Innovative test automation approach

# Agenda

- 1 ProRail
- 2 Why is Testing so Important to ProRail?
- 3 Mission critical systems at ProRail
- 4 Current situation ProRail: challenges in testing
- 5 Test Automation
- 6 The operation of the Test Automation Tool
- 7 Framework developed for comparison
- 8 Results of the comparison and lessons learned

Connexion

Arriva

NS  
(Dutch Railways)

DB Schenker

ProRail

# ProRail is a major ICT Player in The Netherlands

- 3 central datacenters
- 13 local centers for Traffic Control

- Private GSM-R network
- 500 software applications

- 1 ProRail Test Center
- 1 Backup Center

- Planning and control software among the top 10 largest and most complex software applications in The Netherlands
- No own SW development External SW suppliers

- 600 IT employees
- 200 mln Euro spending/year
- 1-0 IT projects/year

# Demonstration ProRail

# Why is testing so important? When IT system fails....

# Headlines

## NS roept ProRail op matje om storingen

(Novum) - De maat is vol voor de [Nederlandse Spoorwegen](#). Een computerstoring bij spoorbeheerder ProRail die het treinverkeer rond [Amsterdam](#) donderdag urenlang platlegde, is de directie van NS bij ProRail al aan op verbeteringen, maar de NS roept ProRail nu nog een keer op het matje.

## NS heeft genoeg van falende computers van Prorail

## Rover na nieuwe storing: 'Stuur top ProRail naar huis'

21 mei 2008 - Bron: ANP

## 'ProRail moet sneller storing voorkomen'

Gepubliceerd: 4 april 2007 00:00 | Gewijzigd: 22 augustus 2008 18:07

## PRORAIL ONDER DRUK

## Politieke partijen en Rover roepen om snellere aanpak van spoorproblemen

woensdag 4 april 2007

**DEN HAAG** -- Spoorbeheerder ProRail moet er snel voor zorgen dat het aantal ernstige verstoringen van treinverkeer afneemt. Dat vinden politieke partijen en maatschappelijke organisaties na een incident waardoor gistermorgen het treinverkeer van en naar Tilburg helemaal stil kwam te liggen.

## Rover: ProRail liegt over storingen

## 'Nog zeker jaar storing op spoor',

Geplaatst: 07 maart 2007 11:45, laatste wijziging: 07 maart 2007 11:45

## Minister wil onderzoek storingen treinverkeer

dinsdag 11 september 2007 | 07:17

*ProRail held accountable for 11 failures*

*Dutch Railways (NS) is done with failing ProRail computers!*

*Send ProRail Management Board home!!*

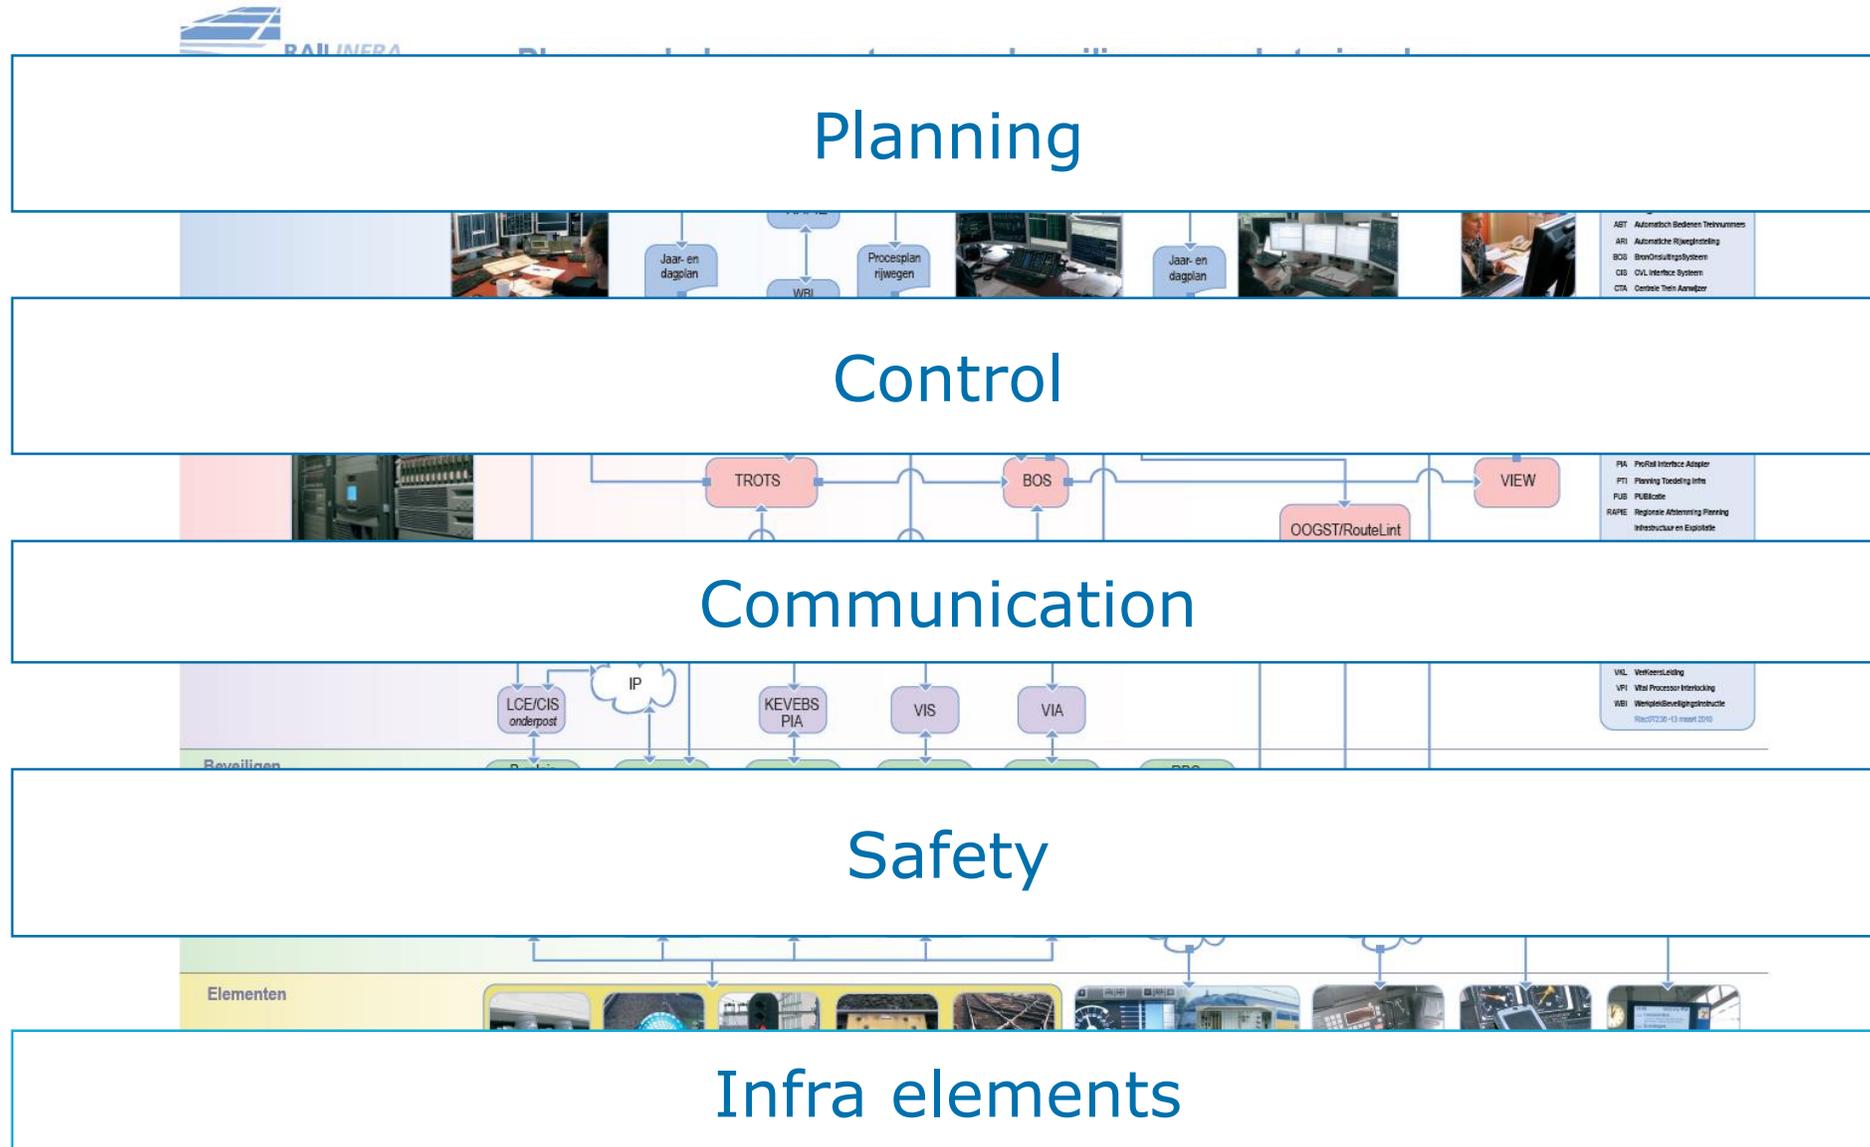

*ProRail under pressure to solve IT problems quickly!*

*Minister wants investigation train traffic malfunctions!!*

# Logistics and traffic control systems

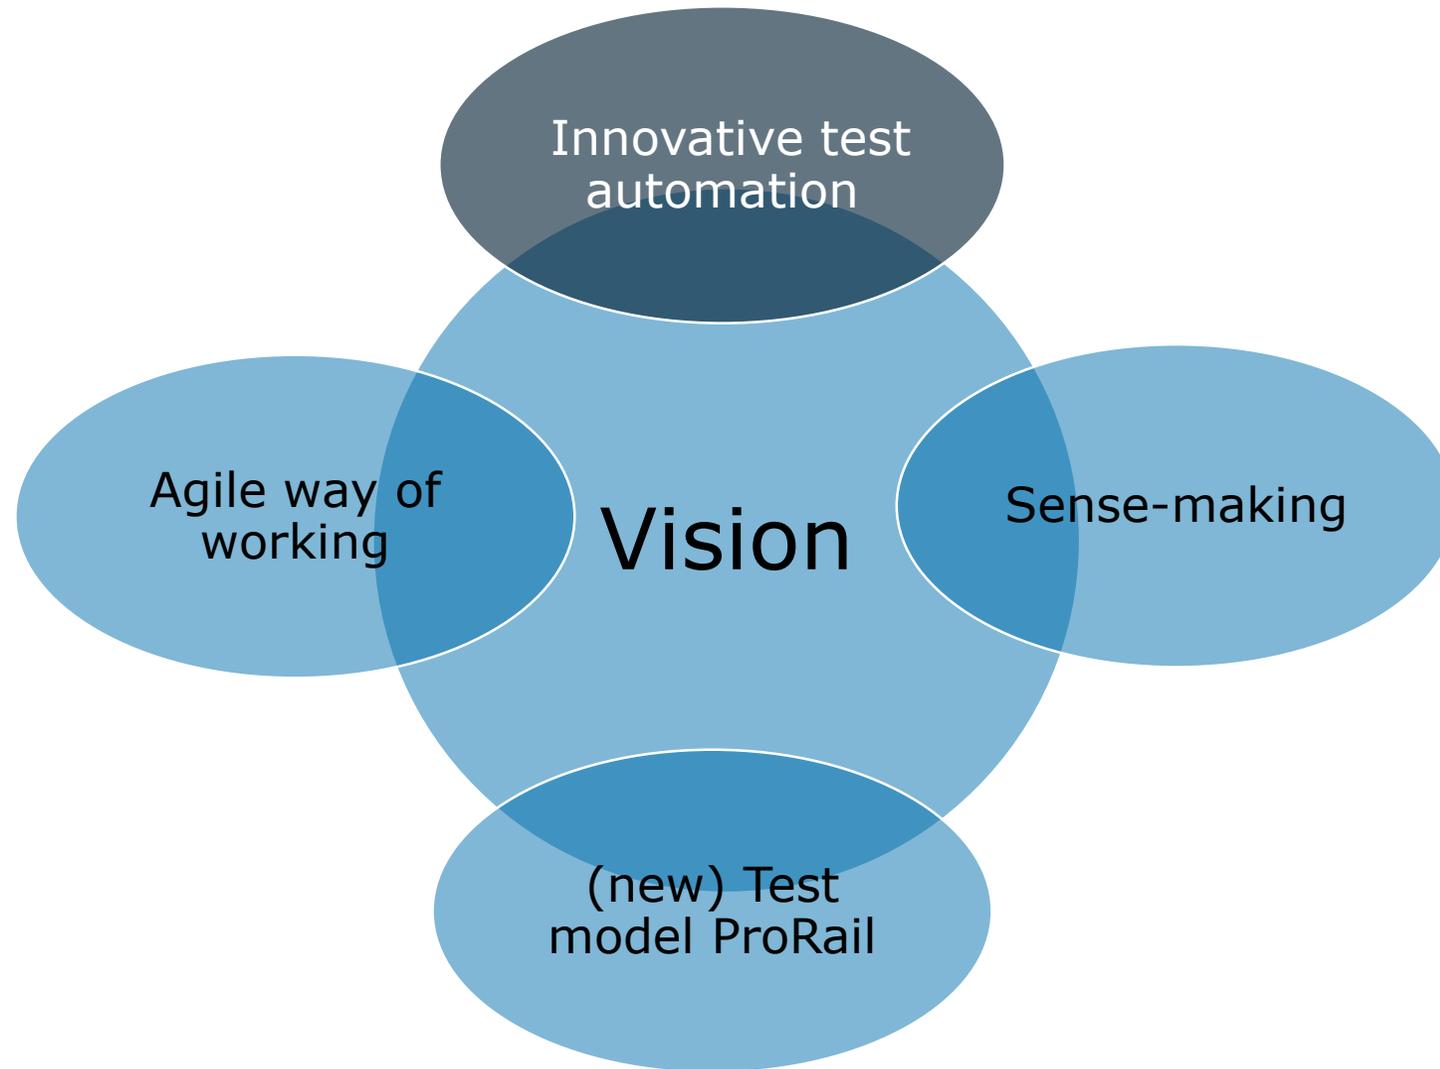

# ICT architecture control systems

# Situation ProRail: challenges in testing

- ▶ No overall test approach and integration environment is missing
- ▶ Testing is vital for operation
  - 1ste time right
  - Customers demand a shorter time to market
- ▶ Agile way of working is growing
  - Test Automation is becoming more important
- ▶ Many Test Automation tools failed in implementation
  - Human factors
  - Maintenance problems with test scripts

# Vision for the challenges

# Experience with Test Automation?

*Who is doing test automation?*

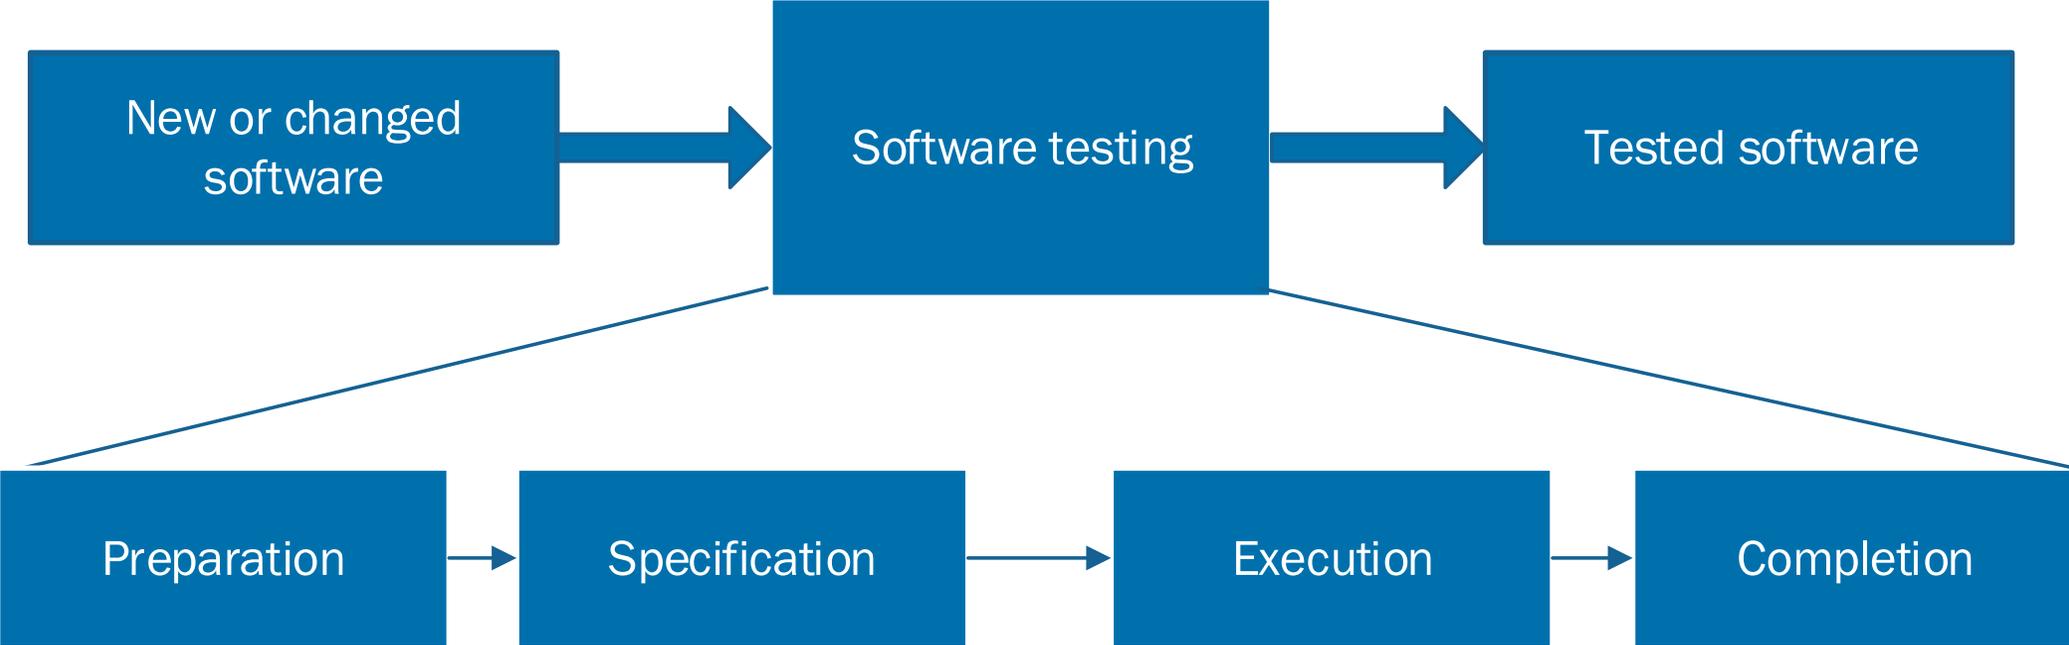

*Are you using test scripts?*

*"Once you abandon the maintenance of the automation, it is likely to die. For a better chance of success, choose a test automation approach that will require the least maintenance"*

*(source: Dorothy Graham & Mark Fewster)*

# Demo - TESTAR

# Framework for comparison (1)

# Framework for comparison (2)

## Learnability

- Time-tracked learning process
- Knowledge level
- Observation hands on learning process

## Effectivity

- Number of faults
- Functional test coverage
- Interviews

## Efficiency

- Time-tracked of:
  - Preparation
  - Execution
  - Evaluation

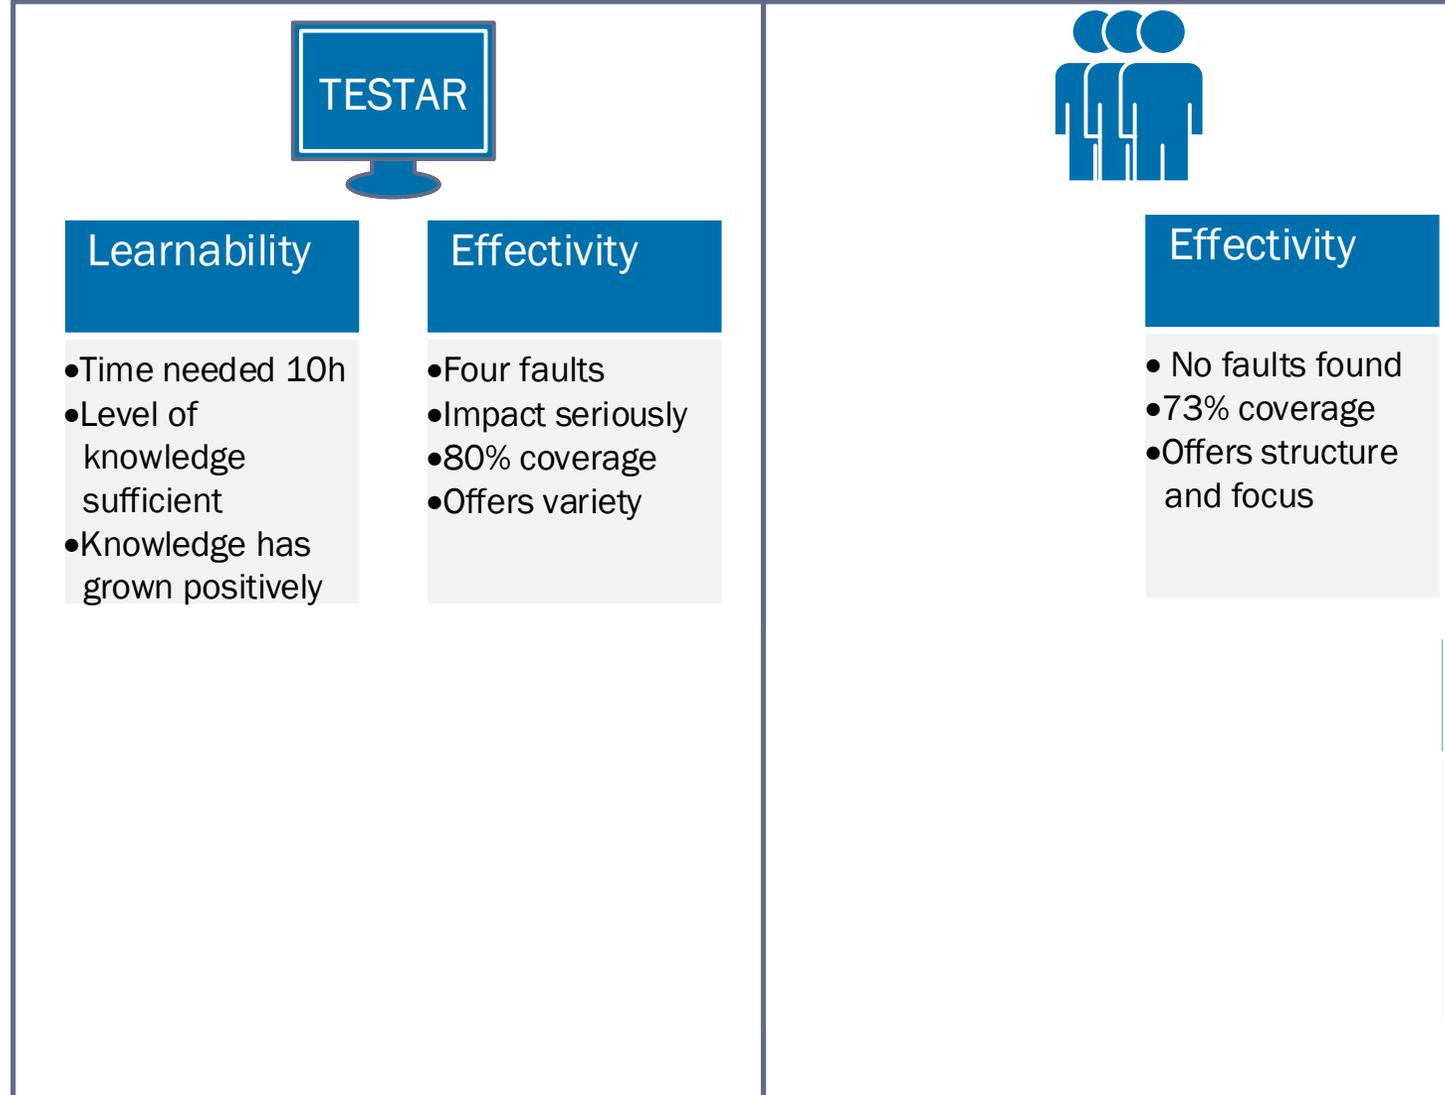

## Satisfaction

- Interviews
- Reaction cards

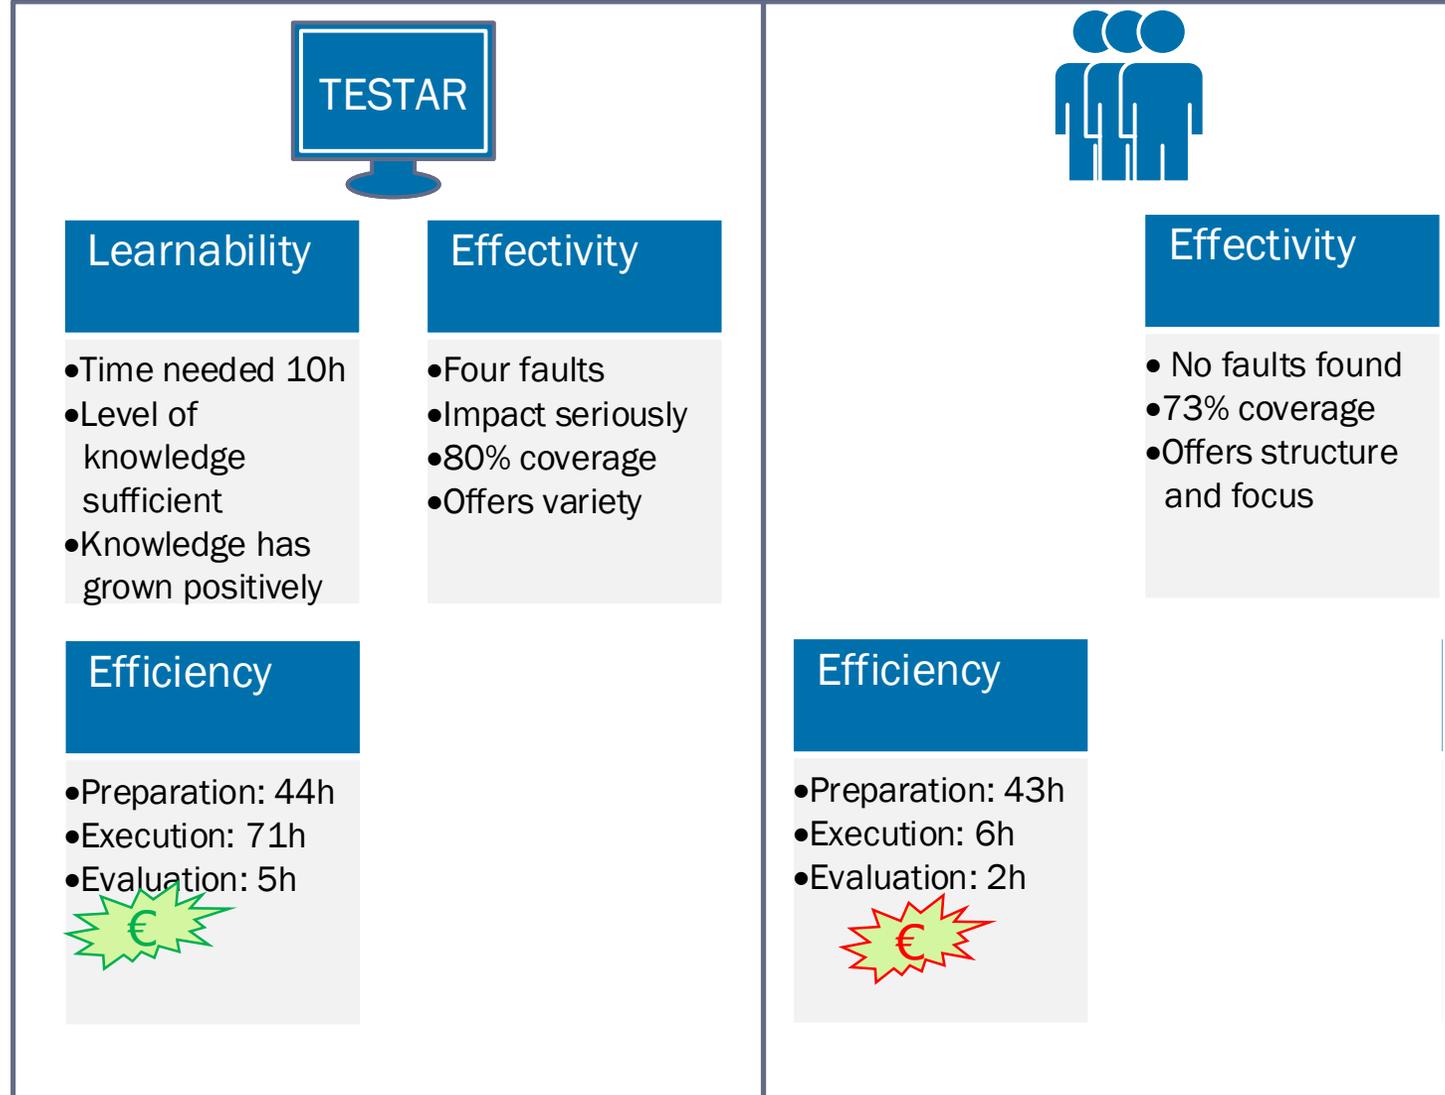

# Results - Learnability

 <p><b>Learnability</b></p> <ul style="list-style-type: none"><li>•Time needed 10h</li><li>•Level of knowledge sufficient</li><li>•Knowledge has grown positively</li></ul>	
---	---

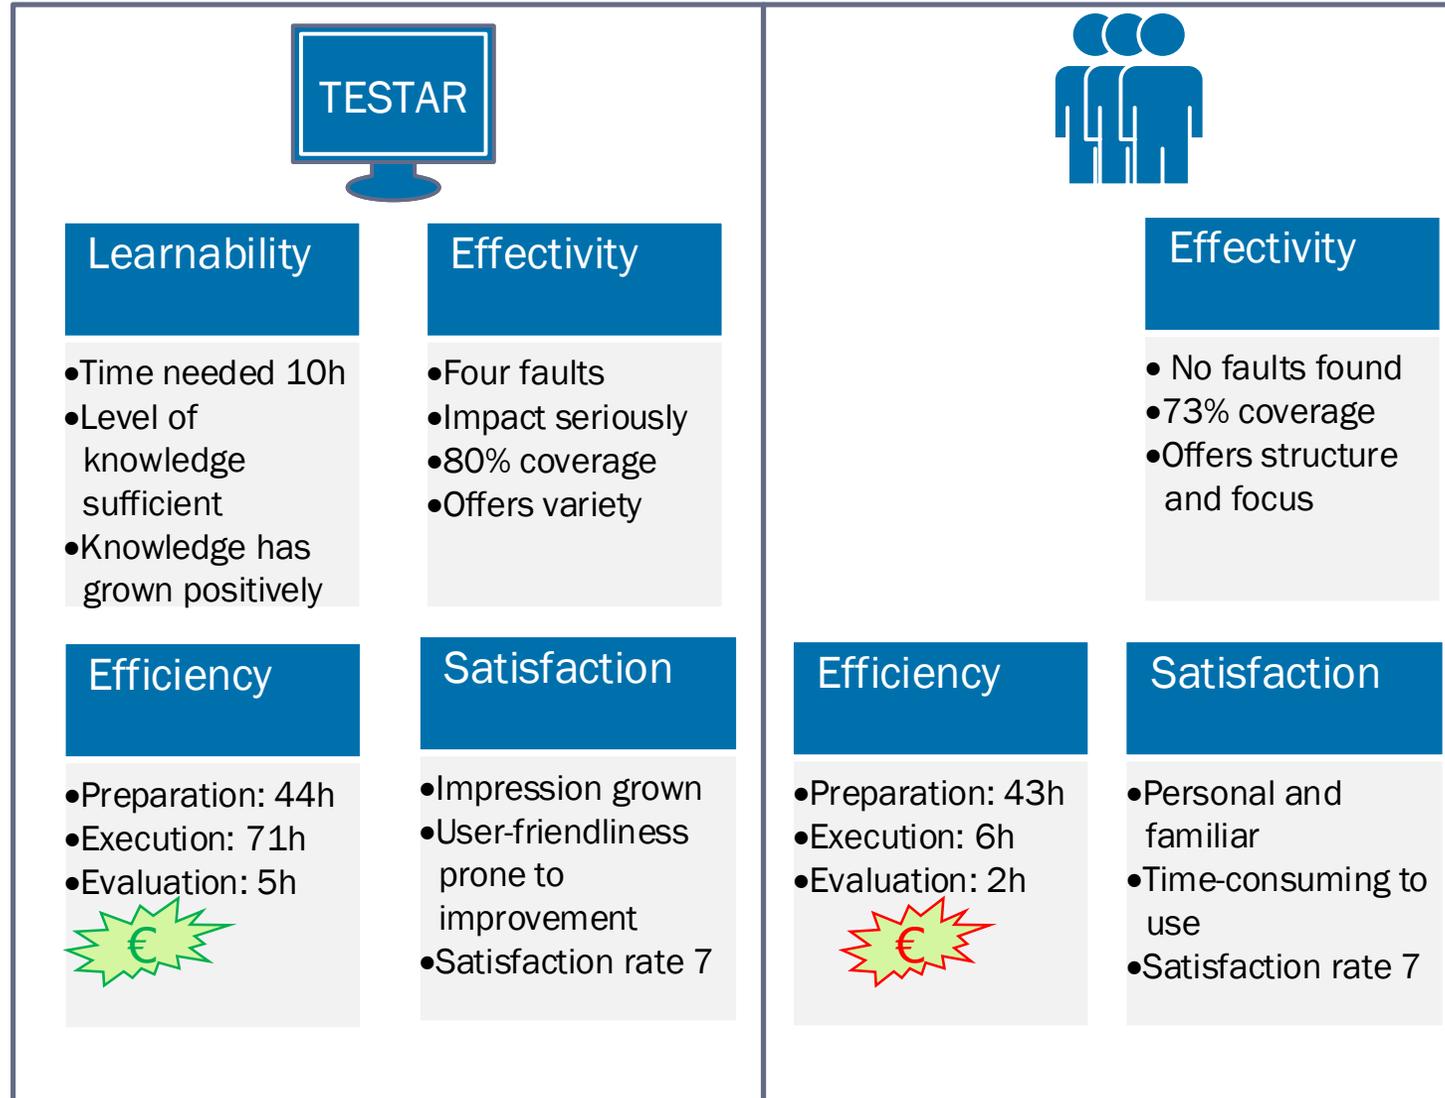

# Results - Effectivity

# Results - Efficiency

# Results – Satisfaction

# Lessons learned

## Lessons learned

- Complementary
- Framework in the railway sector
- GAP between theory and practice
