# **Fighting Test Flakiness: A Disease that Artificial Intelligence Will Cure**

Presented by:

**Tariq King**

Ultimate Software

Brought to you by:

350 Corporate Way, Suite 400, Orange Park, FL 32073  
888-268-8770 · 904-278-0524 - [info@techwell.com](mailto:info@techwell.com) - <http://www.starwest.techwell.com/>

# Tariq King

Tariq King is the senior director and engineering fellow for quality and performance at Ultimate Software. With more than fifteen years' experience in software testing research and practice, Tariq heads Ultimate Software's quality program by providing technical and people leadership, strategic direction, staff training, and research and development in software quality and testing practices. Tariq is a frequent presenter at conferences and workshops, has published more than thirty research articles in IEEE- and ACM-sponsored journals, and has developed and taught software testing courses in both industry and academia. His primary research interest is engineering autonomous self-testing systems. He is cofounder with Jason Arbon of the Artificial Intelligence for Software Testing Association. Contact Tariq via [LinkedIn](#).

# FIGHTING TEST FLAKINESS

A DISEASE THAT ARTIFICIAL INTELLIGENCE WILL CURE

TARIQ M. KING

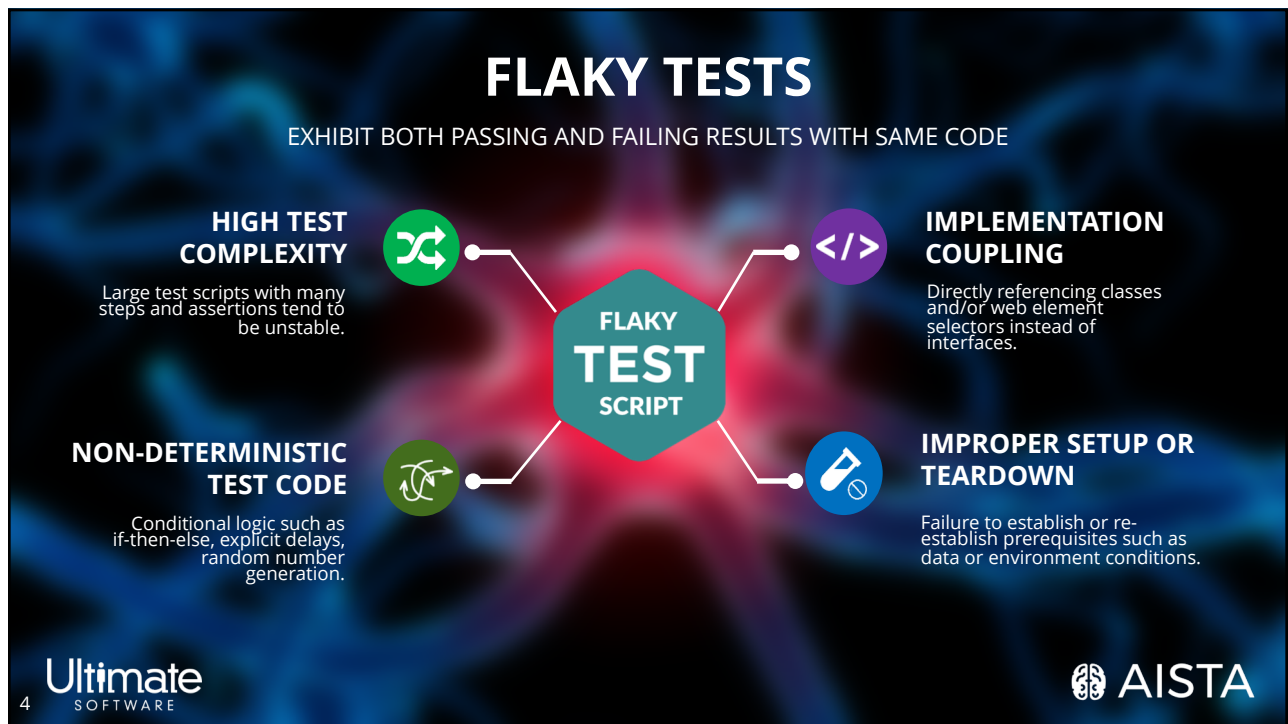

October 3, 2018  
Disneyland Hotel, Anaheim, California

Ultimate SOFTWARE AISTA

# AGENDA

- MOTIVATION
  - TEST FLAKINESS PROBLEM
  - AI FOR SOFTWARE TESTING
- FIGHTING TEST FLAKINESS WITH AI/ML
  - TEST FLAKINESS PREDICTION MODEL
  - AI-DRIVEN TEST AUTOMATION
- WRAP UP

2 Ultimate SOFTWARE AISTA

# LARGE SCALE AUTOMATED TESTING

TESTING CODE CHANGES AND PREVENTING ERRORS THROUGH SCRIPTS.

## COMMIT

Preflight  
Unit Testing

## BUILD

Build Verification  
Smoke Testing

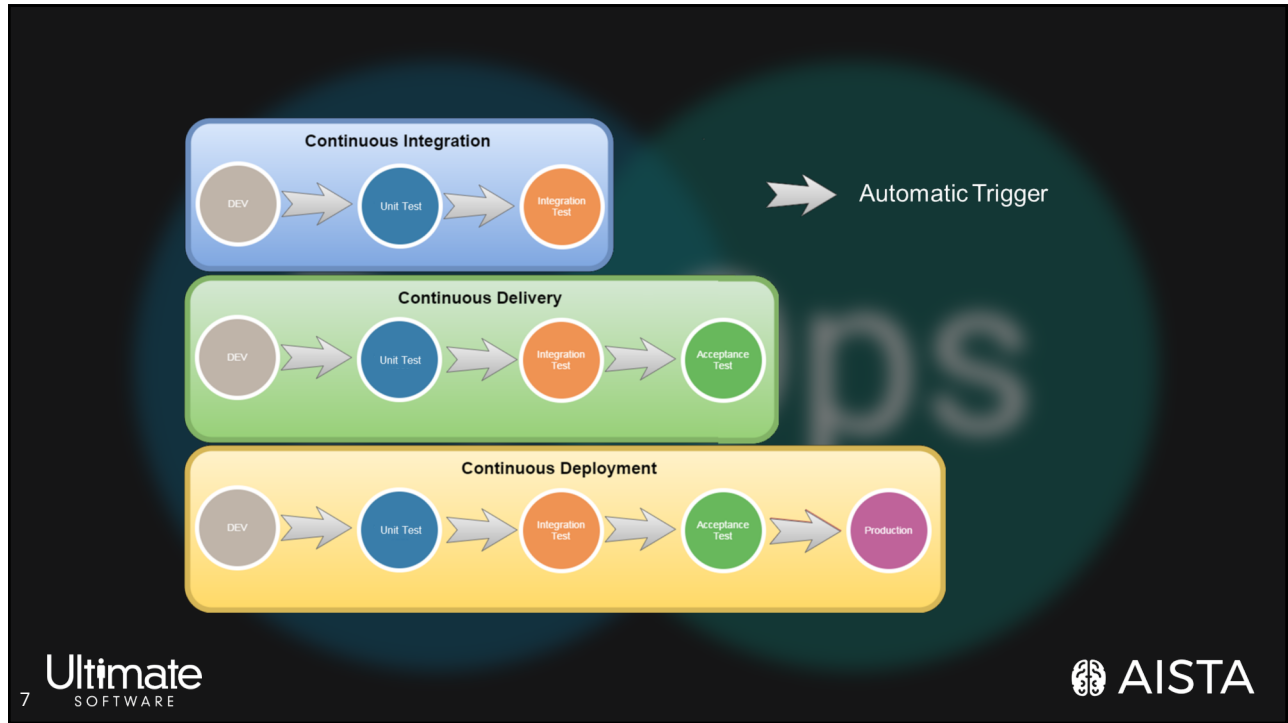

## TEST AND REPEAT

Continuous Integration  
Integration and System Testing

# DevOps

## PRODUCTIVITY FOR DEVELOPERS...

RELIES ON THE ABILITY OF [AUTOMATED] TESTS TO FIND REAL PROBLEMS WITH THE CODE BEING CHANGED OR DEVELOPED IN A TIMELY AND RELIABLE FASHION.

– JOHN MICCO  
SENIOR MANAGER, GOOGLE RESEARCH (2016)

## WHAT WE FIND IN PRACTICE IS THAT...

**84%** OF THE TRANSITIONS WE OBSERVE FROM PASS TO FAIL INVOLVE A **FLAKY TEST!**

– JOHN MICCO  
SENIOR MANAGER, GOOGLE RESEARCH (2016)

## MY SELENIUM TESTS AREN'T STABLE!

**THERE ARE A NUMBER OF COMMON CAUSES FOR FLAKY TESTS THAT I'VE OBSERVED...**

- 1) POOR TEST ISOLATION
- 2) FLAKY EXTERNAL SERVICES
- 3) TIMEOUTS NOT LONG ENOUGH
- 4) TIMEOUTS TOO LONG

– SIMON STEWART

STAFF SOFTWARE ENGINEER IN TEST, GOOGLE (2009)

## artificial intelligence:

- 1 : a branch of computer science dealing with the simulation of intelligent behavior in computers
- 2 : the capability of a machine to imitate intelligent human behavior

The graphic features the acronym 'AIST' in large, white, outlined letters against a dark blue background with a faint image of a robot head and hexagonal patterns. Below the acronym, the full name 'ARTIFICIAL INTELLIGENCE FOR SOFTWARE TESTING' is written in a smaller, white, outlined font.

16 IEEE International Workshop on Automated Intelligent Software Testing, July 16-20, 2018, Lisbon, Portugal. <https://ieeexplore.ieee.org/document/8431959>

## BAYESIAN NETWORKS

BAYES' THEORY OF CONDITIONAL PROBABILITY

$$P(A|B) = \frac{P(B|A)P(A)}{P(B)}$$

Ultimate  
18 SOFTWARE

FIU FLORIDA INTERNATIONAL UNIVERSITY

# BAYESIAN NETWORKS

BAYES' THEORY OF CONDITIONAL PROBABILITY

Conditional probability is the probability of an **event happening**, given that it has some relationship to one or more **other events**.

FINDING AN OPEN PARKING SPACE ?

LOCATION

TIME OF DAY

EVENTS

SOFTWARE

FIU FLORIDA  
INTERNATIONAL  
UNIVERSITY

## APPLYING BAYES' THEOREM

EXAMPLE: MEDICAL DIAGNOSIS

Patient's probability of **liver disease** if they are an **alcoholic**?

Past data tells you that:

- 10% of patients entering the clinic have liver disease.
- 5% of the patients are alcoholics.
- Among patients diagnosed with liver disease, 7% are alcoholics.

A – Patient has liver disease.

$$P(A) = 0.1$$

B – Patient is an alcoholic.

$$P(B) = 0.05$$

B|A – Liver disease given alcoholism.

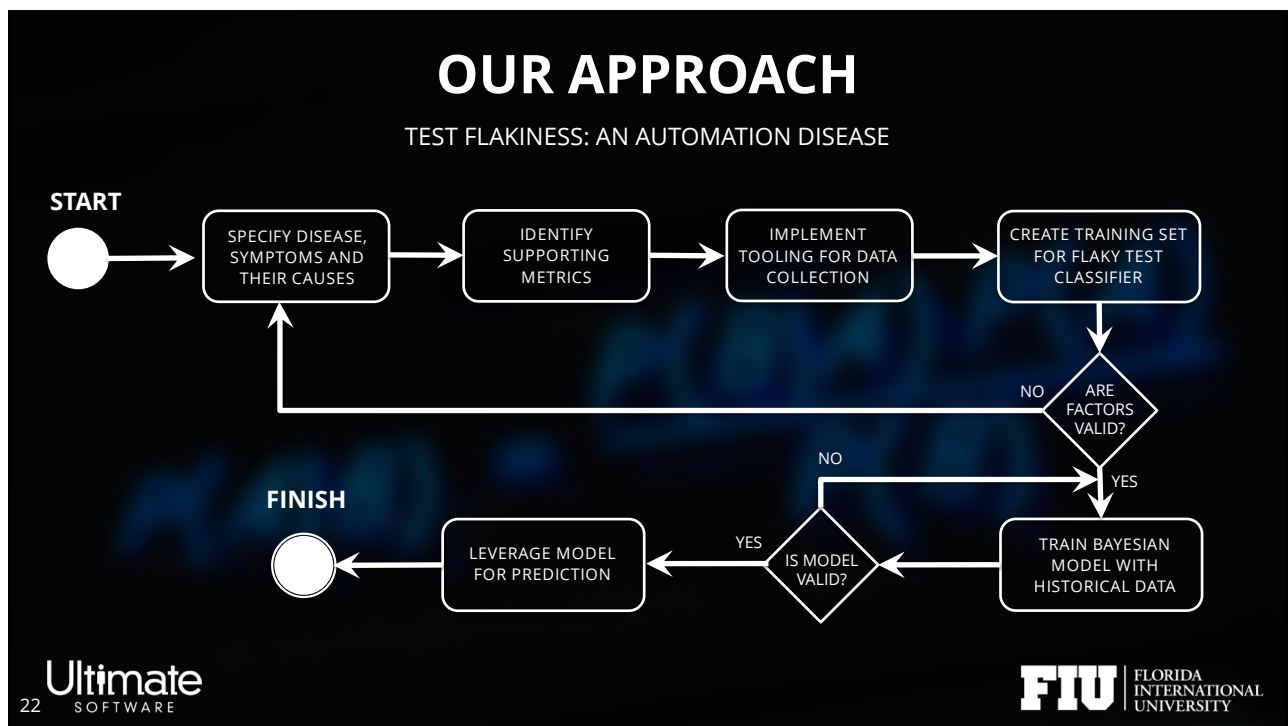

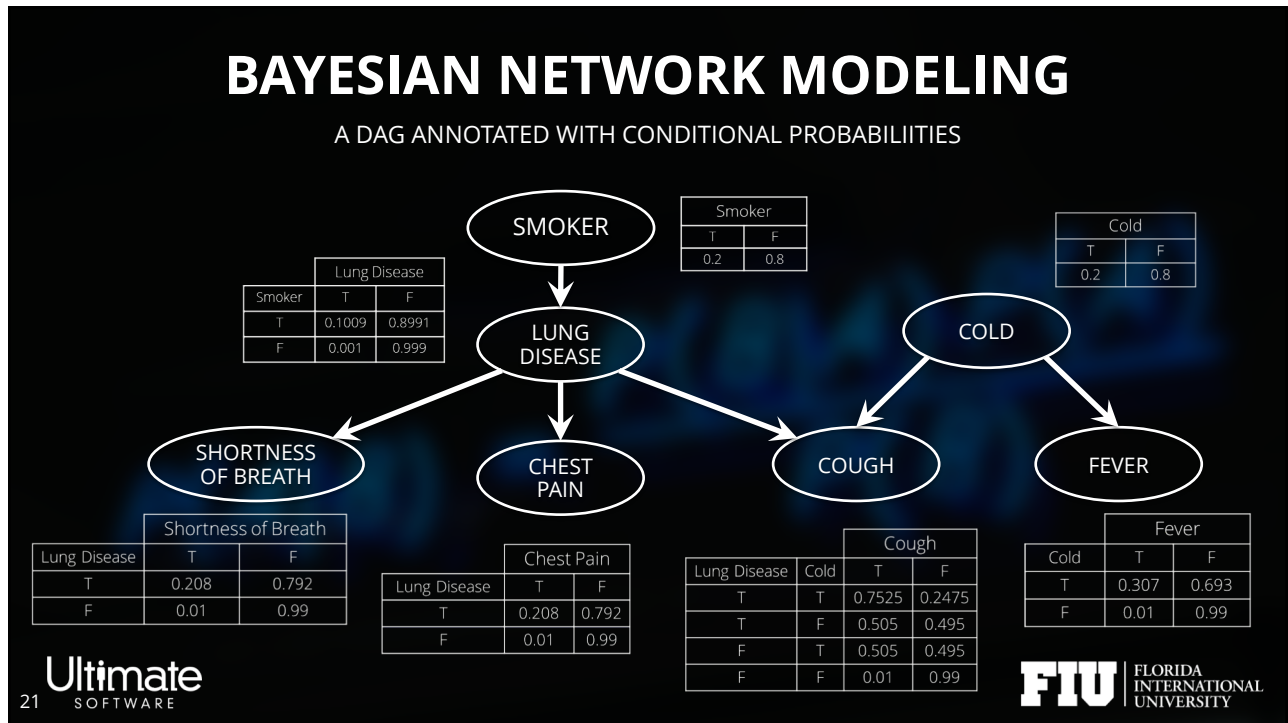

$$P(B|A) = 0.07$$

$$P(A|B) = (0.07 \times 0.1) / 0.05 = 0.14$$

20 Ultimate  
SOFTWARE

$$P(A|B) = \frac{P(B|A)P(A)}{P(B)}$$

# APPLYING OUR APPROACH IN PRACTICE

## CONTEXT AND ENVIRONMENT SETUP

# APPLYING OUR APPROACH IN PRACTICE

## OBJECTIVES AND DATA COLLECTION TOOLING

		Overall					
Team Name	Fixture Name	Cyclomatic Complexity	Avg. Duration	Failure Percentage	Failure Percentage	Failure Percentage	Failure Percentage
Team B	AddOwner	12	8m:40.47s	100.00%	100.00%	100.00%	100.00%
Team C	ViewVets	10	5m:8.35s	100.00%	100.00%	100.00%	100.00%
Team C	SessionZ	10	7m:55.82s	100.00%	100.00%	100.00%	100.00%
Team A	SessionX	10	4m:4.53s	100.00%	100.00%	100.00%	100.00%
Team D	PrintFileFormat	7	29m:12.24s	100.00%	100.00%	100.00%	100.00%
Team E	OvernightPrinting	7	32m:23.79s	31.58%	100.00%	0.00%	29.41%

**BUSINESS GOALS**

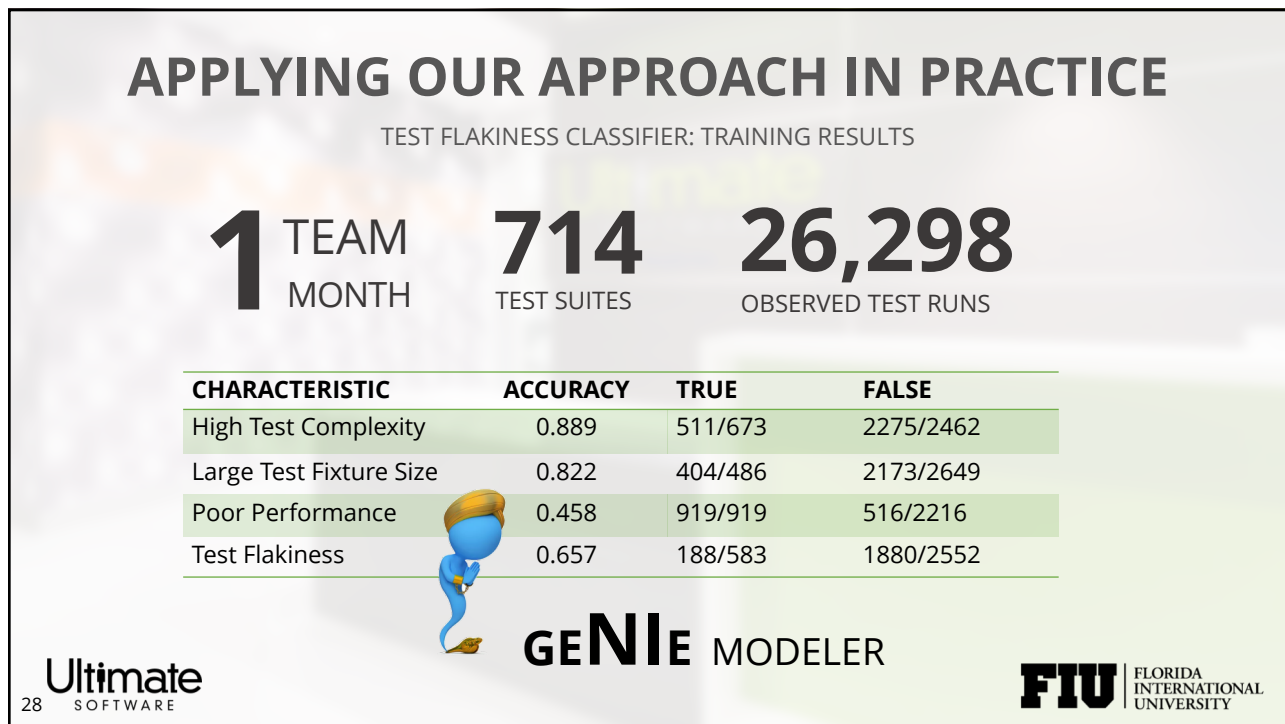

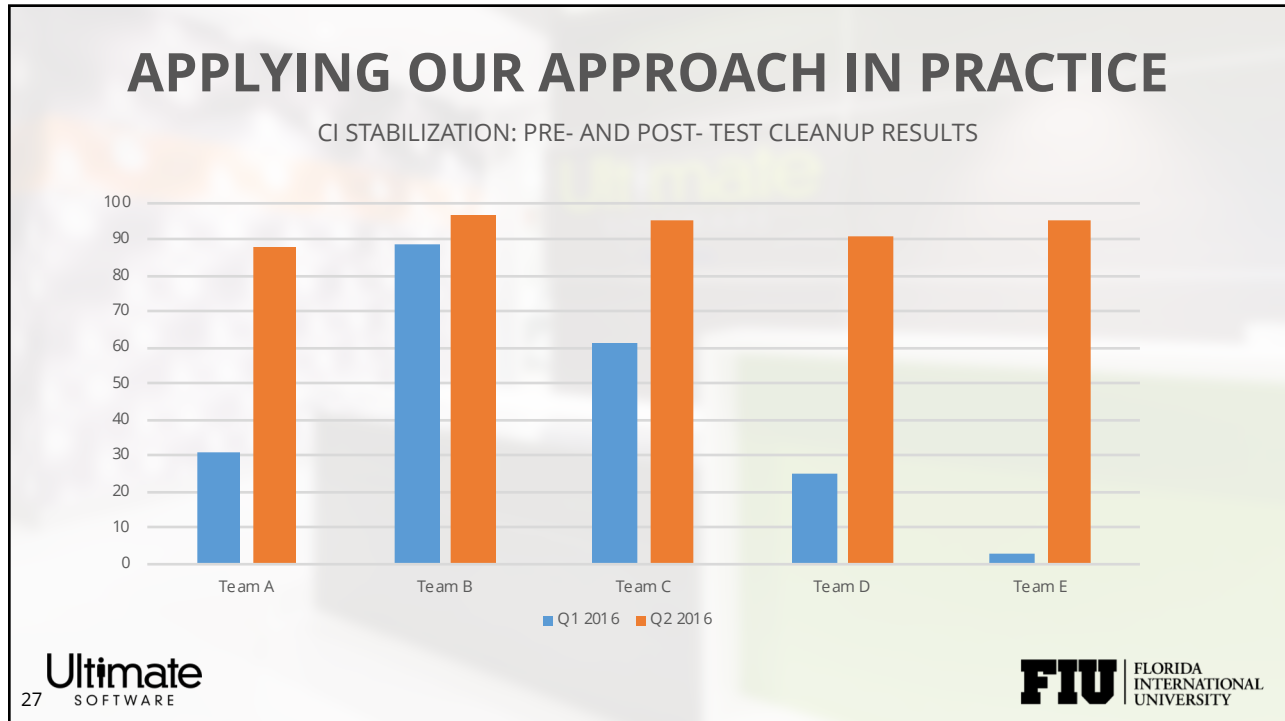

- IDENTIFY FLAKY TESTS
- QUARANTINE
- FIX OR THROW OUT

**RESEARCH GOALS**

- VALIDATE MODEL
- GENERATE TRAINING SET
- EVALUATE APPROACH

## NEXT STEPS

### ONGOING AND FUTURE WORK

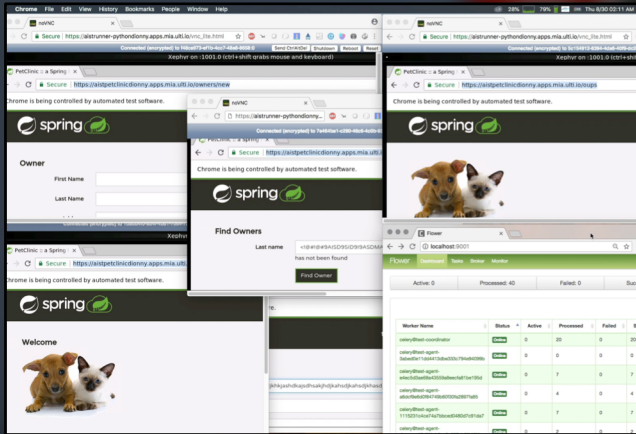

- Our test flakiness prediction tool is still in the alpha stage.
- Currently extending the tool for an beta release with development teams at Ultimate Software.
- In the future would like to conduct a comparative case study in collaboration with other organizations.
- Aspiring to build a self-healing CI/CD pipeline that learns from fixes to autocorrect flaky tests.

# AI-DRIVEN TEST AUTOMATION
